

Professional Underbody sealant

Corrosion protection compound with noise suppression effect on asphalt basis.

A lasting thixotropic corrosion protection compound with a noise suppression effect on asphalt basis. After the evaporation of the solvent the product creates a tough elastic layer that protects the underbody from stones and weather conditions.

- 360° valve
- full depletion of the content
- Quality controlled by TÜV

Scope of application:

Underbody sealant offers a lasting corrosion protection of the underbody of cars, trucks and buses.

More information at www.v-lube.de

Application:

Shake well before use. The underbody has to be stable, clean and dry and free of fat. Dependant on the use the product is dilutable with solvent.
